Meeting 4

Anh Le

September 24, 2014

1 Readings

- Re-read week 1 chapters on vectors

- If you can't do our vectors exercise after reading the chapter, do the Introduction and/or Vector chapter on `www.datacamp.com`, which is a Codeacademy-type site for R

2 In-class excercises

I will re-do Week 1 exercises on the board. Please take this chance to ask ANY question you may have.

If you could do Week 1 exercises by yourself, you really should belong to the self-study group. Note that I still reserve half an hour each week to answer questions to both groups, so the self-study group is not alone!

3 Other announcements

- You now have the option to re-grade someone's homework in case you made a mistake in grading the first time

- You are REQUIRED to submit your work in .pdf and .Rnw (using `knitr` and `LaTeX`). Reproducible research is part of our training. Tell me if you need help in this regard.

  I could code the website so that your assignment wouldn't be accepted otherwise – but that's too harsh, so for now the penalty comes through grading.
